GLOBALLY, APPROXIMATELY 267,000 WOMEN WILL BE DIAGNOSED WITH ADVANCED OR METASTATIC BREAST CANCER THIS YEAR THAT IS 15% OF ALL BREAST CANCER DIAGNOSES

UP TO 11% OF NEW BREAST CANCER CASES ARE INITIALLY STAGE IV OR METASTATIC

UP TO 1 IN 3 PEOPLE WITH EARLY-STAGE BREAST CANCER WILL ULTIMATELY DEVELOP METASTATIC DISEASE

METASTASES ARE RESPONSIBLE FOR ~90% OF BREAST CANCER-RELATED DEATHS

BREAST CANCER DIAGNOSES OF ALL 15% PEOPLE WITH EARLY-STAGE BREAST CANCER WILL ULTIMATELY DEVELOP METASTATIC DISEASE

BECAUSE NEARLY 100% OF MBC PATIENTS BECOME RESISTANT TO STANDARD OF CARE THERAPIES

DESPITE THE STATISTICS, PROGRESS IS CURRENTLY BEING MADE IN THE TREATMENT OF ADVANCED BREAST CANCER
